

How Gasgrid Finland and Fingrid contribute to Finland's hydrogen economy?

Gasgrid Finland and Fingrid continue their important cooperation to develop Finland's energy system and enable the growth of Finland's hydrogen economy. Link to the Final report below: [Energy transmission networks as enablers of the hydrogen economy and a clean energy system](#) Additional information:

What is Finland's Energy and Climate Strategy?

Finland's energy and climate strategy targets carbon neutrality by 2035, emphasizing energy security, sustainability, and biodiversity.

Is there a gas wholesale supplier in Finland?

There was also only one gas wholesale supplier. Commissioning of Balticconnector pipeline in December 2019 connected the Finnish gas market to Baltic gas markets and enabled gas market opening for competition from 1 January 2020. Gas import through the Imatra entry point was suspended on 21 May 2022 due to currency-related matter with Gazprom.

Why is Gasgrid Finland and Fingrid important?

Gasgrid Finland and Fingrid promote comprehensive development of energy infrastructure in line with future needs in order to promote Finland's competitiveness. In addition to energy infrastructure, it is important to promote the realization of investments in renewable energy production and hydrogen economy value chains in Finland.

Are there other gas storages in Finland?

In Finland there are no other gas storages. Gasgrid Finland Oy submitted its application for the certification of the TSO to the Energy Authority in January 2020. Final certification decision was given on 19 August 2020. Gasgrid Finland Oy is fully owned by the State of Finland.

Does Finland use natural gas?

Finland has no production facilities or underground storage facilities for gas. Natural gas has been used in Finland since 1974 after the first oil crisis. Gasum is the Finnish importer and seller of natural gas, which owns and operates Finnish natural gas transmission system.

The goal of the EGT-TWINN project is to enhance research and technical capacity at the Geological Survey of Estonia EGT to accelerate Estonia's transition from fossil fuel energy to green energy. The project will contribute to ...

The erg is the CGS unit of energy: It is defined as being: the energy transferred to (or work done on) a body when a force of 1 dyne acts on that body in the direction of the force's motion through a distance of 1 centimetre. Thus: $1 \text{ erg} = 1 \text{ dyn} \cdot 1 \text{ cm}$ Conversion Factors
