

Which energy storage stocks are a good investment?

Albemarle is the top holding, followed by Tesla, so if you can't decide from the previous stocks, this fund is a good one-stop investment to play the pending energy storage boom. With more than \$1 billion under management and about 60 components, this First Trust fund is another interesting and diversified way to play energy storage.

How much does energy storage cost?

Lastly, the cost of energy storage has been decreasing steadily over the past several years, making industry-scale storage economically viable (e.g. lithium-ion cost decreased from \$1,183 per kWh in 2010 to \$137 per kWh in 2020).

What is the iShares energy storage & materials ETF?

The iShares Energy Storage & Materials ETF (the "Fund") seeks to track the investment results of an index composed of U.S. and non-U.S. companies involved in energy storage solutions aiming to support the transition to a low-carbon economy, including hydrogen, fuel cells and batteries.

Are Cheap batteries the future of energy storage?

Cheap batteries mean that wind and solar will increasingly be able to run when the wind isn't blowing and the sun isn't shining. BNEF's latest Long-Term Energy Storage Outlook sees the capital cost of a utility-scale lithium-ion battery storage system sliding another 52% between 2018 and 2030, on top of the steep declines seen earlier this decade.

What are some interesting energy storage ETFs?

Another interesting energy storage ETF is GRID, which is focused on alternative energy infrastructure companies such as power management company Eaton Corp. (ETN), industrial conglomerate Johnson Controls International PLC (JCI), and electronics and automation pioneer Abb Ltd. (ABB).

Is the Invesco solar ETF a good investment?

The Invesco Solar ETF has a total expense ratio of 0.67% and a majority allocation of solar energy holdings. Because this fund specializes in one form of alternative energy, it may not be as diversified as other funds that invest in various types of energy.

These are the leading funds to tap into alternative and renewable energy stocks. The megatrend of clean energy doesn't show signs of slowing down anytime soon. While the pressures of climate ...
