Cheapest 2kW Solar Inverter. In India, you can find many companies that make 2-kilowatt solar inverters, but if you want to buy the cheapest inverter on which you can also install 2-kilowatt solar panels, then you will need to buy a solar inverter with PWM technology.

4. A subsidy amount of 3kW on grid solar systems is Rs. 43,764 by the central government. There are some states that provide a state subsidy of 30,000 for a whole system. That means, you will get Rs. 43,764 to 73,764 but you need to invest all the cost of the solar project yourself. A subsidy amount will be withdrawn within 30-60 days in the consumer bank ...

If you want the cheapest solar system, you can choose a PWM technology solar inverter. However, I recommend using an inverter with MPPT technology, which is slightly more expensive but offers better performance. An inverter with MPPT technology, along with a solar panel system, costs around 70,000 to 75,000 rupees. Cellcronic 5kw ultra inverter

Find out how much solar panels cost for different size homes and pv system sizes plus whether solar panels are getting cheaper. Solar panel prices are from RICS. ... When are solar panels cheapest? Prices vary during the year. For example, between April 2022 and March 2023, prices per kW were highest in January, February and March 2023 and ...
