

How many green hydrogen projects are there in Chile?

Moraga Paredes, Executive Director H2 Chile and Managing Director Continua Soluciones SpA recently commented in an interview with *Energy Strategica* that as of August 2021, the portfolio of green hydrogen projects in Chile has tripled compared to November 2020, going from 20 to 60 projects.

Will Chile be a top destination for hydrogen investment in Latin America?

In 2020, Chile released its green hydrogen strategy which set out to make the country the top destination for hydrogen investment in Latin America by 2025 with at least 5 GW of electrolysis capacity operating and producing 200k/tons of hydrogen per year. With such a lofty goal, the country needs a healthy project pipeline.

Will Chile become a hydrogen leader?

Austrian Energy and *Siemens*, with the HNH Energy project, which will produce 150,000 tons / year of H₂ or 850,000 tons / year of green ammonia for export. It is still early stages in terms of Chile strategy to become a hydrogen leader.

What is the first green hydrogen floatation plant in Chile?

The second project was inaugurated this year at Anglo American Las *Tentas* floatation plant, which consists of a Power-to-Mobility system to feed H₂ forklifts at a mining site. It is a small demonstration plant which has generated the first green hydrogen in Chile for electromobility.

What is a hybrid energy storage system (HyESS)?

The first since 2017, from Enel Green Power and Enap, located in the Antofagasta region, is a Hybrid Energy Storage System (HyESS) which comprises a 125 kWp solar PV installation backed by a 450kWh hydrogen storage system and a 132kWh lithium storage system.

Enel through EGPC currently operates in Chile renewable plants with a combined installed capacity of more than 1.1 GW, of which 564 MW comes from wind energy, 492 MW from solar PV, and 92 MW from hydropower, which makes ...

Chile: National: Other energy: Covid-19 Solidarity Benefit (ban on service cuts due to unpaid bills for electricity and gas during... Power generation: Multiple energy types: Loan (Hybrid) 01/04/2020: Energy use (all energy types, consumption in transport, household use, buildings etc) Ministry of Energy: Government

Hybrid Energy Group Family run business established since 2008. Built with the noble purpose of supporting and educating Irish homeowners and businesses to become more energy-efficient and understand the benefits of doing so, as renewable, and green energy becomes increasingly relevant. Mechanical contracting including Design, Installation ...

This international standard looks at continuous quality improvements in products, services and customer experience. Superior customer service is our No.1 priority, consistently meeting our customers needs and expectations. Hybrid Energy ...

The issue starts with an insightful guest comment from Cristiano Spillati, Managing Director at Limes Renewable Energy where he discusses the need for European renewable energy suppliers to accelerate the rate of the energy transition. This is followed by a regional report from Cornwall Insights on the battery energy storage industry in Australia.

atrice Buffon, EDF Group Senior Executive Vice-President in charge of the International Division and Chairman of EDF Renewables, commented, "EDF is proud to contribute to Chile's energy transition with this landmark solar plant. CEME 1 is a key asset of the hybrid thermal and renewable platform we are developing in the country.

Enagas, Acciona and GNL Quinteros have partnered to develop the "Green Hydrogen Bah&a Quintero" project, which seeks to offer a sustainable energy alternative, contributing to the decarbonization process of the country's ...

Hybrid Energy Group facilitates investment in renewable energy systems that benefit the environment. HEG believes that clean energy production is one of the most important and challenging opportunities presented to our society today, and the development of economically viable renewable energy sources is a compelling and productive avenue for ...

Chile's first energy efficiency law targets initially a 10% reduction in energy intensity by 2030 compared to 2019. The new law, the first of its type in the country's history, addresses energy efficiency in the three primary energy consumption sectors, residential, public and commercial accounting for almost a quarter, transportation on just over one-third and ...

En Grupo Energy Inversiones estamos enfocados en impulsar la sostenibilidad social, ambiental y económica, contribuyendo en la transición hacia un modelo energético sostenible, es por esto que aportamos en proyectos que permitan valorizar los residuos y fomentar el aprovechamiento energético de ellos, evaluando y desarrollando con tecnologías eficaces para un futuro limpio y ...

Switzerland-based institutional investment group SUSI Partners has entered a development deal for two large-scale solar-plus-storage hybrid power plants in Chile. The group, focused on investments in sustainable ...

Supreme Decree No. 70 of 2023 (DS 70) has been recently approved, modifying Supreme Decree No. 62 (DS 62), which regulates the capacity payment, also called sufficiency power, in Chile. This modification introduces significant changes in the recognition and compensation of energy storage systems and hybrid

plants with storage capacity. Recognition ...

AES has seen a hybrid wind, solar and battery energy storage system (BESS) project in Chile receive an environmental permit, while Oenergy has suffered a setback for a standalone project. Updates for both projects were recently posted by the Environmental Assessment Service (Servicio de Evaluaci3n Ambiental or SEA) of Chile, where the grid ...

Chile's solar energy potential is particularly promising for the aquaculture industry, and we are excited to explore this further," said Christian Gerardo Sch28;fer Oyanedel, General Manager of AKVA group Chile. By partnering with Inseanergy and Kverneland Energi, the AKVA group embraces low-emission and deep-farming technologies.

The AKVA group has announced a partnership with Inseanergy to achieve the electrification of the Chilean aquaculture industry. Therefore, Chile's solar energy potential will be used for fish farming operations. "Chile's solar energy potential is particularly promising for the aquaculture industry, and we are excited to explore this further," said Christian Gerardo ...
