

# China energy storage building navigation map

What is China's Energy Infrastructure?

Includes oil ports, refineries, and storage facilities; crude and refined product pipelines; coal and nuclear power plants; and EV battery factories. Refreshed interactive map of China's energy infrastructure. Rice University's Baker Institute for Public Policy issued an update to its interactive China Energy Map launched last year.

What information is displayed on the China Energy Map?

By clicking an icon or line on the map, facility-level information is displayed in the popup tooltip, including facility name, operator, status, year online, designed capacity, and additional infrastructure details. As of April 2021, the China Energy Map had the following total coverage by infrastructure type:

Does Rice University have a China Energy Map?

HOUSTON - (April 14, 2022) - Rice University's Baker Institute for Public Policy has released its latest China Energy Map, an open-source, interactive chart of the country's energy infrastructure.

What is the Energy Infrastructure Map project?

The goal of the map project is to provide an open, comprehensive, and regularly updated source of energy infrastructure data to help facilitate improved analysis by a broad range of participants. The map provides an online visualization of key energy infrastructure.

How many layers are there in China's Energy System?

Since July 2020, it now features 13 additional layers, including natural gas infrastructure, coal, nuclear, wind, solar power plants, hydrogen infrastructure, carbon capture projects, mining operations, and electric vehicle (EV) battery factories, providing a more complete picture of China's energy system.

Does the China Energy Map show EV battery manufacturers?

Data displayed on the China Energy Map has been confirmed with multiple sources before mapping. Specifically, with the difficulties of tracking individual EV battery manufacturers, we verified each EVB facility with recent job postings in addition to company websites/lookup pages.

HOUSTON - (April 14, 2022) - Rice University's Baker Institute for Public Policy has released its latest China Energy Map, an open-source, interactive chart of the country's energy infrastructure. The China Energy Map provides a ...

In 2023, electrochemical energy storage will show explosive growth. According to the "Statistics", in 2023, 486 new electrochemical energy storage power stations will be put ...
