

Thailand are in talks with CATL to bring EV battery manufacture to the country. Credit: Sergii Chernov. The government of Thailand has started negotiations with China's Contemporary Amperex Technology Co (CATL) aiming to incentivise battery production to the country. Are your battery recycling initiatives going far enough?

Thailand was noted as an EV market of heavy growth and potential by the International Energy Agency in April. In 2021, Taiwan's Foxconn partnered with Thailand's state-owned energy firm PTT in a \$1.04bn joint venture to produce EVs in the country.

Official numbers from Thailand showed that the country had more than 140,000 newly registered 4-wheel EVs during the nine months to September, amounting to more than a quarter of the total 520,000 registered vehicles during the period.

In China, the electric vehicle industry has emerged from the fact that batteries are safer and more reliable. Because in the past, when the battery was not considered safe enough, it couldn't be used in the car. ... Thailand Energy ...
