

Why are Chinese solar panels being stored in European warehouses?

European spending on solar power components had increased from EUR6bn in 2016 to more than EUR25bn last year, leading to a glut of Chinese solar panels that were now sitting in European warehouses, the second letter read. The amount of Chinese photovoltaic cells in storage was enough to cover Europe's overall annual demand twice over, it said.

Will the European Parliament block solar panel imports from China?

Two policies are working their way through the European parliament that could lead to obstacles for solar panel imports from China: the corporate sustainability due diligence directive and the forced labour regulation. Both will require agreement between the parliament and the EU's 27 member states.

Should energy supply chains be reliant in Europe?

The Breakthrough Institute, a California-based think-tank, says the carbon intensity of manufacturing in China, where electricity is mostly produced by burning coal, is a powerful argument for moving supply chains into more renewable-reliant regions in Europe.

Are Chinese companies dumping in the European market?

Chinese companies had now taken "a dumping stance in the European market", offering two-year contracts with prices "consistently undercutting" spot market prices. Such deals usually included clauses that demanded minimum orders and exclusivity, it added.

Will Europe deploy more battery based energy storage in 2020?

2020. 4 ggy Storage News (Andy Colthorpe), Europe predicted to deploy nearly twice as much electrical storage in 2020 than last year, 2021.403 Ecofys, commissioned R- Support to R&D strategy for battery based energy storage, Battery Promoting Strategies in Selec

Are Chinese photovoltaic cells a dumping stance in Europe?

The amount of Chinese photovoltaic cells in storage was enough to cover Europe's overall annual demand twice over, it said. Chinese companies had now taken "a dumping stance in the European market", offering two-year contracts with prices "consistently undercutting" spot market prices.
