

Is China targeting Europe for electric vehicle sales?

As the first results for 2023 start coming in from Europe's finished vehicle-handling ports, it is clear that China is targeting Europe for electric vehicle sales at a time when ro-ro capacity is recovering and shipping is facing geopolitical disruption.

Why is China growing in Europe's auto industry?

China's growing presence in Europe's auto industry is a result of deals to supply car manufacturers in the region, where electrification is being driven by ambitious decarbonisation plans that aim to end the sale of combustion engine vehicles by 2035.

What is Batteries Europe technology platform?

Whether the application focus is mobility or stationary usage. In 2020, Batteries Europe technology platform published a strategic research agenda for the entire batteries value chain. In 2021, it was detailed in technology road-maps for all segments of the value chain as well as guidance on cross-cutting issues such as safety

Will China's electric car industry overtake traditional automotive heartlands?

Industry executives and policymakers are worried. While China was relatively late to develop a car industry that can compete with Europe and the US on engine technology, the shift to electric gives it the chance to overtake traditional automotive heartlands.

The U.S. National Science Foundation (NSF) provides data on countries' shares of total value added in the motor vehicle, trailer, and semi-trailer industries (unfortunately, it does not break out EVs separately) and it finds that ...

China's EV surge in Europe amid ro-ro capacity challenges. As the first results for 2023 start coming in from Europe's finished vehicle-handling ports, it is clear that China is targeting Europe for electric vehicle sales at a ...

In China, battery demand for vehicles grew over 70%, while electric car sales increased by 80% in 2022 relative to 2021, with growth in battery demand slightly tempered by an increasing share of PHEVs.

system energy storage, vehicle power batteries focus on the test requirements for battery system (pack) and the requirements are higher than those in the energy storage field; while the energy ...

As EV sales continue to increase in today's major markets in China, Europe and the United States, as well as expanding across more countries, demand for EV batteries is also set to grow quickly. In the STEPS, EV battery demand grows ...

Sungrow Power Supply Co., Ltd. is a national key high-tech enterprise focusing on the R& D of the top 10 energy storage system integrator, production, sales and service of solar energy, wind energy, energy storage, hydrogen energy, ...

As energy storage systems become less expensive and competition grows, trading strategies gain in complexity. Until recently, energy storage systems in Europe relied on "traditional" revenues that were mostly ...

A bidirectional EV can receive energy (charge) from electric vehicle supply equipment (EVSE) and provide energy to an external load (discharge) when it is paired with a similarly capable EVSE. Bidirectional vehicles can provide ...

Germany leads the production of EVs in Europe and accounted for nearly 50% of European EV production in 2023, followed by France and Spain (with just under 10% each). Battery production in China is more integrated than in the United ...

Tesla's Shanghai plant will be able to make 10,000 Megapacks a year with a combined 40 GWh of storage capacity, official media has reported. Rival BYD delivered 22 GWh of batteries for energy...

Since 2008, the company has deeply cultivated the electric vehicle battery business, forming a whole industrial chain layout with battery cells, modules, BMS and PACK as the core, extending upstream to mineral raw materials, ...
