

Where is Christmas Island?

The Territory of Christmas Island is an Australian external territory in the Indian Ocean comprising the island of the same name. It is located approximately 350 kilometres (190 nautical miles) south of Java and Sumatra and about 1,550 km (840 nmi) north-west of the closest point on the Australian mainland.

Is 'Christmas Island' a comfort?

There is one piece of land in sight, but it's not a comfort tonight. It is almost as if it is mocking you with its name -- it's called "Christmas Island."

How did Christmas Island get its name?

The uninhabited island was named on Christmas Day, 1643, by Captain William Mynors as he sailed past, leaving to William Dampier the honour of first landing ashore in 1688. ^Dampier, William (1703). *A New Voyage Round the World*. The Crown in St. Paul's Church-yard, London, England: James Knapton. ^"Where is Christmas Island?"

Is Christmas Island a state?

The territory falls under no formal state jurisdiction, but the Western Australian government provides many services as established by the Christmas Island Act. The Australian government provides services through the Christmas Island Administration and the Department of Infrastructure and Regional Development.

What is Christmas Island known for?

The majority (63%) of the island is included in the Christmas Island National Park, which features several areas of primary monsoonal forest. Phosphate, deposited originally as guano, has been mined on the island since 1899. William Dampier (left) and Charles Swan (right) aboard the latter's ship *Cygnet*, as illustrated in a work by Jules Verne.

Why is Christmas Island a good place to live?

Because of its proximity to South East Asia, Christmas Island falls within many of the satellite footprints throughout the region. This results in ideal conditions for receiving various Asian broadcasts, which locals sometimes prefer to those emanating from Western Australia.

According to the latest analysis from our colleagues at Solar Media Market Research, operational capacity in the UK is expected to reach 7.3GW and 11.6GWh by the end of 2024. While its European friends and neighbours are starting to accelerate their efforts, it remains likely the UK market will remain on a strong trajectory, as Solar Media analyst Mollie ...
