

Who is developing a collie battery in Western Australia?

UGL is developing and constructing Stage 1 of the Collie Battery in Western Australia for client Neoen. This battery energy storage system (BESS) has a capacity of 219MW/877MWh and includes associated energy infrastructure, construction of an access track to the site.

What is the Collie battery energy storage system (cbess) project?

In line with the WA State Government's decarbonisation strategy to be delivered by 2030, our Collie Battery Energy Storage System (CBESS) Project forms part of Synergy's decarbonisation strategy. Coal-fired power generation is being replaced with renewable energy generation infrastructure and energy storage solutions.

Which countries are supplying a big battery in Collie & Kwinana?

The Western Australian government has awarded contracts for its 500 MW /2,000 MWh big battery in Collie and the 200 MW /800 MWh extension to the existing Kwinana battery. China's CATL is set to deliver the battery units for both projects, while Spain's Power Electronics will supply inverters.

Who owns Collie battery?

Neoen acknowledges the Wilmen Noongar people, Traditional Owners of the land on which Collie Battery will store energy. We pay our respects to their Elders past and present. Collie Battery is Neoen's first 4-hour long duration battery & its first major project in Western Australia. The project has development approval for 1 GW /4 GWh.

Where is UGL constructing a collie battery?
