

Dell EMC Centera is an archiving system that uses objects as storage elements with the application or the Centera Universal Access server storing the objects using an Ethernet interface. Dell EMC Centera introduced a new protocol for transferring data and identifying the objects being stored: Content Addressable Storage or CAS.

Content Addressed Storage ... Das erste kommerziell verfügbare CAS-System, die EMC-Centera-Plattform, ist kennzeichnend für eine CAS-Lösung. Sie wurde speziell dazu entwickelt, unveränderbar digitale Daten und Langzeit-Informationen auf schnellen Festplatten aufzubewahren. ... Die Centera setzt dabei auf den 128 Bit langen MD5 Algorithmus ...

The EMC Centera approach to storing fixed content offers the following valuable benefits: o Ease of Management: EMC Centera technology greatly simplifies system planning and management of terabytes to petabytes of content storage. EMC Centera does not use typical file systems for storing content.

The new standard in unstructured data storage is becoming more prevalent: object storage. Systems like EMC's Elastic Cloud Storage (ECS) offer greater flexibility in hardware configuration, lower overall costs and most importantly a wider variety of protocols that include Content-Addressable Storage (CAS), like Centera, as well as support for ...

EMC Centera ist ein Speichersystem mit inhaltsbezogener Adressierung für IP-Netzwerke, das für die Archivierung von unveränderbaren respektive feststehenden Inhalten (Fixed Content) mit geschäftskritischen Informationen entwickelt wurde.. Das Content-Adressed-Storage-System (CAS) bietet Online-Zugriff auf die Daten und garantiert Content-Authentizität.

Mike Kahn, Managing Director of The Clipper Group, Inc., said, "With Centera, EMC invented CAS storage, and now is the clear leader in the content-based storage market with nearly 70 petabytes installed. EMC's recent enhancements ease management and increase security over archived information, making EMC Centera even more desirable to the broad ...

The offspring of EMC's 2001 acquisition of storage software company FilePool NV, CAS and Centera reflect a NAS lineage in that the storage system connects via an Ethernet network and serves ...

Website: Go to site: Description: Centera provides fast, secure, on-line access to digital content such as scanned document and check images, electronic statements and other computer generated reports, e-mail message archives, medical images, Microsoft Office documents, and many other data types that require long-term storage with immediate access.

Centera Migrate The fastest EMC Centera Data Migration software. EMC Centera was one of the first mainstream disk-based WORM (write once, read many) storage platforms. Many organizations that needed a solution to securely and confidently store data without the fear of deletion, utilized EMC Centera. Since that time, a

EMC Centera is available immediately. List price begins at \$101,500 for Centera hardware and \$103,200 for Centera software, representing \$204,700 for a 5-terabyte protected (10 terabytes raw capacity) total system configuration. Centera implementations scale from 5 terabytes (protected) to more than one petabyte, in 2.5-terabyte increments.

Looking to improve its offerings for preserving data cost-effectively, EMC has refreshed its Centera line by reworking the archiving software so it can be accessed by disparate platforms.. The Centera Universal Access (CUA), a software appliance unveiled today, supports non-integrated applications built on Windows, Linux, Unix and IBM's iSeries platforms.

Nexsan Technologies, specialized in enterprise ATA/SATA disk arrays, just pulled off an intriguing acquisition, since it will allow the firm to drive its hardware with ILM software, and thus to compete with products such as EMC's Centera with a more affordable offer. All this with the acquisition, for an undisclosed amount, of AESign Evertrust, known [...]

The new Centera Virtual Archive lets customers cluster up to four 128-node Centera content addressed storage (CAS) systems into a campus-wide virtual archive, according to Peter Thayer, senior director of product marketing in EMC's storage division. With 1TB drives, that could mean half a petabyte in a single content archiving system, and the ...
