Lighting accounts for up to 40% of the electricity used in commercial buildings, and can rise to as high as 70% in certain situations. By removing up to 80% of this cost through the installation of energy efficient LED lighting would be highly beneficial for a business with intensive lighting demands, and who are looking to improve their building's energy efficiency.

CPSL Group were asked to install an EO25 Wind Turbine for a dairy farm in Scotland. The client wanted to utilise the farm land available & install a 25kW wind turbine to significantly reduce their energy costs & help contribute toward their carbon footprint.
