

When is navigating uncharted waters & grid interconnections in Curacao?

Michael Ginsberg will present Navigating uncharted waters: Grid interconnections in Curacao during the session dedicated to Island Power: Renewables for Diesel-Powered Utilities on Oct. 14, 2021, 8-10 a.m. MDT. This year's conference, Powering the New Energy World, includes six separate online sessions over three days.

Why is the feed-in tariff unsustainable in Curaçao?

In Curaçao, the feed-in tariff was generous but poorly designed and unsustainable due to the lack of investment in energy storage, distribution transformers and other infrastructure needed to support high penetrations of variable renewable energy. Know who manages renewable energy policy at the utility.

Why did the Curaçao utility refuse to give up centralized power generation?

Ginsberg said the Curaçao utility did not like giving up its centralized power generation business model, felt threatened by the rapid uptake of residential solar and was unprepared for the supply/demand mismatch from variable wind and solar.

How much does electricity cost in Curaçao?

The average commercial and residential electricity rates in Curaçao are \$0.35 per kilowatt hour (kWh), according to the U.S. Department of Energy, far higher than the average \$0.12 per kWh Americans pay.

Where is Curaçao located?

The island of Curaçao -- home to approximately 150,000 -- is a popular Caribbean tourist destination and a semi-autonomous region within the Kingdom of the Netherlands. A close neighbor to Venezuela, Curaçao has its local oil refinery that endears politicians to the oil industry and supports many residents with oil industry jobs.

Does Curaçao rely on fossil fuels?

Nonetheless, like many Caribbean islands, Curaçao depends heavily on imported fossil fuels and pays a stiff penalty in the form of high electricity rates and gas prices for transportation.

Together, OATI and USA Microgrids created the OATI Microgrid Technology Center, a standing showcase of how power systems and renewable energy resources can work together to provide resilient energy. Now EVolution(TM) -- ...

OATI is "The Most Trusted Name in Energy" with 2,200 customers using OATI Smart Grid, Energy Trading, Transmission Reliability and Operations, Distribution, and Regulatory service and technology offerings in the NERC CIP compliant Energy Only OATI Cloud. ... Architecture Counsel (GWAC), featuring Chris Irwin of the U.S. Department of Energy ...

Once a microgrid is defined, it is possible to implement policies that support the development of microgrids. These policies would provide financial support for companies & utilities that design and use microgrids and would ensure the microgrids lead Minnesota towards equitable solutions of power distribution.

OATI Microgrid Technology Center putting on final touches Friday, December 9th, 2016 Open Access Technology International (OATI) is putting the final touches on the new OATI Microgrid Technology Center, situated in the high-traffic cross section of 494 and Highway 100 in Bloomington, Minnesota.

USA Microgrids utilizes the OATI GridMind™; microgrid control system to connect, integrate, and intelligently manage your microgrid assets for reliable and cost-effective power. [LEARN MORE](#). Our Services. Microgrid design is made ...

As OATI looks to the future, it also focuses on advanced data center architectures, mobile technologies, smart grid hardware devices with Public Key Infrastructure (PKI) security, advanced microgrid optimization and control, and most recently, deployment of next-generation advanced technologies supporting the incorporation of Internet of Things ...

OATI Microgrid Technology Center is a new 5-story office building and data center. The 106,000 sq. ft. building features space for 300 employees, as well as a 9,000 sq. ft. training center. OATI occupies the Microgrid Technology Center on the second floor. The building is designed as a showcase in energy technology with an internal, fully ...

Able to find and fill data gaps, the Soterea(TM) MDM solution provides comprehensive functionality to support meter data loading, validation, storage, estimation and communication. OATI Soterea(TM) is fast, reliable, cloud-based, and scalable to handle large meter data volumes with flexibility.

o The cutting-edge technologies used to provide power in the OATI Microgrid Technology Center o How the OATI Microgrid Technology Center was designed to power the building, even in the event of a power outage. About. USA Microgrids can deliver improved energy economics, resiliency, and reliable power while making the planning, designing ...

The OATI Energy Conference returns to Las Vegas in 2025 for OATI's 30 th Birthday Bash! Be sure to save the date so you don't miss out on what is sure to be our biggest and best conference yet! Be sure to save the date so you don't miss out on what is sure to be our biggest and best conference yet!

The companies providing hardware for the OATI microgrid are "alliance partners" and are part of the company's pitch, said Terry Mohn, executive consultant with OATI. Vendors were carefully selected for the ...

OATI is pleased to announce a recent agreement with North Carolina Electric Membership Corporation

(NCEMC), the power supplier for North Carolina's network of electric cooperatives, to create the state's first neighborhood microgrid at the new Heron's Nest Environmental Village, which was developed and built by Ollo and The Adams Group.

The new Microgrid Technology Center for OATI is a five-story office and data center facility. This award-winning project is a showcase of technology that controls an Advanced Microgrid and utilizes waste heat from power production.

The story in Curacao portrays the universal challenges that accompany integrating high amounts of variable renewable energy into a centralized electric grid designed for constant power supply. The conflicting ...

idential "microgrid" development. A microgrid is a network of buildings that essentially acts as a miniature power grid. It can operate outside of the larger municipal electrical system by ensuring backup power for the entire development, which can be produced by a solar array system and stored in a battery.

OATI was able to rise to the challenge with our comprehensive demand response management system -- webDistribute. OATI webDistribute allows utilities to monitor, control, schedule, and manage Demand Response assets and Distributed Energy Resources. OATI webDistribute is ...
