

Which repowerEU areas are most relevant for Cyprus?

As a result, a list of potential investments and reforms is provided at the end of Chapter 3.1 for each one of the main REPowerEU areas that are particularly relevant for Cyprus - energy savings, renewable energy deployment, sustainable mobility, and energy interconnections.

Why is repowerEU not relevant for Cyprus?

The two other main areas of REPowerEU - diversifying energy supply and reduction of fossil fuel use in industry - are less pertinent for Cyprus for the reasons explained below, hence the relevant investments and reforms are included under the areas of energy savings and renewable energy.

What if Cyprus does not have a natural gas supply?

As explained in Section 3.1.3, in the absence of natural gas supplies and hydrogen infrastructure, diversification of energy supply for Cyprus is equivalent to accelerating the use of renewable energy, and the relevant gaps have been addressed in the previous paragraphs. d. Reducing fossil fuel consumption in industry

What is Cyprus' energy supply?

Cyprus' total energy supply consists by 85% of fossil fuels, of which petroleum products dominate. Some diversification will happen once the Cyprus LNG import terminal is in operation, so that most of the thermal power plants will run on natural gas.

How can Cyprus curb its energy dependence?

Overall, to curb its energy dependence, Cyprus must invest in further energy efficiency improvements in buildings and road transport and accelerate the deployment of renewables.

Why does Cyprus have a high electricity price?

Cyprus has one of the highest electricity prices in Europe, due to high reliance on liquid fuel for power generation. However, a major transition is imminent for electricity supply. On one hand, indigenous natural gas discoveries are to be developed in the coming years.

JPB Solar Energy Cyprus offers you the possibility to gain from cheaper electricity and buy and pay for the photovoltaic system after 3 years at a discount of 15%. After those 3 years you can decide every year to buy the system at a compounded discount of 5% annually. So, after 4 years you pay 80% of the quotation amount, after 5 years 75% of the quotation amount, etc.
