

The specification of the PowerSafe OPzS cells make it ideal for a wide range of applications such as telecommunications, power generation and distribution, railway, airport and seaport signalling, computing, emergency lighting, automation and measuring systems.

Dilute sulfuric acid electrolyte with specific gravity of 1.240 Lead alloy leak proof terminal and fully insulated solid copper inter-cell connectors Engineered with an optimized plate design, EnerSys PowerSafe OPzS batteries feature an increased capacity exceeding the DIN standard.

The pasted negative flat plate design provides the perfect balance for maximum performance. The robust design of PowerSafe OPzS batteries makes them a perfect fit for your application.

Batteries must be installed in accordance with IEC 62485-2 and national/local regulations. The management systems governing the manufacture of PowerSafe® OPzS products are ISO 9001, ISO 14001 and ISO 45001 certified 2022 EnerSys. All rights reserved. Trademarks and logos are the property of EnerSys and its affiliates unless otherwise noted.

Disenadas con una placa optimizada, las baterías Powersafe OPZ cuentan con una mayor capacidad que supera el estandar DIN. Adem&s, la placa tubular fundida a presi&n con bajo contenido de antimonio ofrece excelentes ...

PowerSafe OPzS batteries feature tubular plate technology that offers excellent cycling performance together with a proven long life under float voltage conditions. The pasted negative flat plate design provides the perfect balance ...
