

What are solar panels used for in Cyprus?

Solar panels in Cyprus are used for residential, industrial and commercial properties. Other than home use, many businesses install photovoltaic panels in Cyprus for self-consumption. That is, they use the energy the photovoltaic system generates directly, but cannot store any excess energy for following months.

Does Cyprus support photovoltaic systems?

The government of Cyprus, along with the RES and Energy Conservation Fund, offers support schemes for the installation of photovoltaic systems. This is because solar power is considered to be the future of energy and promoting the use of renewable energy sources is a priority.

Who is gesolar Cyprus Ltd?

GESOLAR CYPRUS LTD is one of the leading companies in the field of renewable energy sources (RES) in Cyprus, offering integrated energy solutions with specialization in the fields of Photovoltaic Systems, In-floor Heating /Cooling and Air Conditioning.

What is a commercial photovoltaic system in Cyprus?

Commercial photovoltaic systems in Cyprus are usually used by businesses for self-consumption. That is, the energy generated by the solar panels is solely used for the building where the panels are installed.

Who installs solar panels in Cyprus?

Cypriot solar panel installers - showing companies in Cyprus that undertake solar panel installation, including rooftop and standalone solar systems. 49 installers based in Cyprus are listed below.

What is a solar pump in Cyprus?

Solar pumps in Cyprus are pumps that work with the energy generated by solar panels. Solar pump maintenance is very important to ensure that the system works as it should and that the water is clean.

And there are also power purchase agreements (PPA). Under a PPA, you do not pay for the solar system. In fact the PV system is on your roof but is owned by a company. You pay a reduced price for the electricity produced by the solar system. After a couple of years, you have the option to buy the system from the company.
