

What makes dukosi unique?

Dukosi's unique chip-on-cell technology and proprietary C-SynQ™ communication protocol transform the way batteries are designed and monitored. The DKCMS on-cell monitoring and nonvolatile embedded memory also provide lifetime traceability, enabling customers' products to be compliance-ready for upcoming regulations like the EU Battery Passport.

Where is dukosi based?

Dukosi said it will continue to build its activities at its base in Heriot-Watt University Research Park and subsequently through global expansion. Dukosi chief executive Nat Edington said: "The team and I are delighted to announce this exciting development for the company, as we move to bring our ground-breaking technologies to market.

What companies has dukosi been a part of?

Prior to joining Dukosi, he held senior positions at major companies in the semiconductor industry from startups and scaleups to large multi-billion-dollar companies, including XMOS, Renesas, Dialog Semiconductor, Frontier Silicon, and Sony Semiconductor.

What's new at dukosi?

"It is an extremely exciting time for Dukosi as we release the first DKCMS chips into production, putting real intelligence on every cell," said Mark Pinto, CEO of Dukosi. "We've been investing in all our global locations, growing our talent and presence to better serve our expanding market opportunities worldwide.

How big is the market for dukosi ICS in 2025?

The market for Dukosi's solution is substantial and fast growing. At one Dukosi Cell Monitor per cell in a typical battery, there is an opportunity for 2 billion ICs in 2025 based on published EV and BESS sales forecasts, which grow at 14.8% per year over the following decade.

What is dukosi's new contactless solution?

Dukosi's novel contactless solution overcomes the limitations of traditional wired and far field wireless systems and frees physical design constraints to provide greater safety, design flexibility and scalability.

Dukosi Ltd develops revolutionary technologies that dramatically improve the performance, safety, and efficiency of battery systems, and enable a more sustainable battery value chain. The company provides a unique cell monitoring solution based on chip-on-cell technology
