Is DC-coupled storage a good option for solar-plus-storage projects?

Although AC-coupled infrastructure is common for existing solar-plus-storage projects, in many cases, opting for DC-coupled storage greatly improves energy transfer efficiency and performance, while lowering capex.

How efficient is a DC/DC inverter?

Diverting power from the inverter to the DC/DC comes at an efficiency cost. The battery roundtrip efficiency is approximately 93% plus twice the DC/DC conversion loss of 98.2% equals $98.2\% \times 93.0\% \times 98.2\%$, and then times the 98.0% inverter efficiency to get the power out to the grid = 87.9%.
