

Disassembly of the light energy storage device

What are light-assisted energy storage devices?

Light-assisted energy storage devices thus provide a potential way to utilize sunlight at a large scale that is both affordable and limitless.

Do light-assisted energy storage devices have a bottleneck?

After the detailed demonstration of some photo-assisted energy storage devices examples, the bottleneck of such light-assisted energy storage devices is discussed and the prospects of the light-assisted rechargeable devices are further outlined. The authors declare no conflict of interest.

Are solar energy storage devices a conflict of interest?

The authors declare no conflict of interest. Abstract Various energy storage devices are highly demanded by our modern society. The use of solar energy, an important green energy source, is extremely attractive for future energy storage. Rec...

How to design a battery disassembly system?

The design of the disassembly system must consider the analysis of potentially explosive atmospheres (ATEX) 1 of the area around the battery pack and, if necessary, adopt tools enabled to work in the corresponding ATEX zone.

What is uneven distribution in battery disassembly?

Uneven distribution is tackled in considering the processing of multiple batteries between multiple disassembly cells, also introducing into the problem the associated risk to each process from the level of deformation of the battery components.

Are battery pack designs a key obstacle to automated disassembly?

As identified in various studies, a key obstacle is the significant variation in battery pack designs, which complicates the automation process. Thompson et al. highlighted that the diversity in battery pack designs, along with the use of various fixtures and adhesives, impedes automated disassembly.

Light-assisted energy storage devices thus provide a potential way to utilize sunlight at a large scale that is both affordable and limitless. Considering rapid development and emerging problems for photo-assisted ...

Disassembly of the light energy storage device

In addition, a partially or fully automated disassembly process could decrease disassembly costs (Harper et al., 2019; Wegener et al, 2014, 2015). Recycling cost of commercial battery packs ...

In this study, triangular fuzzy numbers for addressing correlations among attributes and the importance of factors are used. For weak relationships, $f(1, 2, 3)$, medium $f(4, 5, 6)$, and strong $f(7, 8, \dots)$...

The global energy crisis and climate change, have focused attention on renewable energy. New types of energy storage device, e.g., batteries and supercapacitors, have developed rapidly because of their ...
