The company's power conversion expertise covers both power electronic converters, required to produce mains quality electricity and/or device control, through to generators that can convert mechanical energy produced by the renewable device into electrical energy.

Smarter Grid Solutions chief technology officer Dr Bob Currie said: "Distribution System Operators need reliable and proven solutions that can flex to meet local and system-wide needs as more and more DER comes online while ensuring seamless interoperability with existing systems.

The concept of distributed generation (DG), power generated from numerous micro-scale sources for local distribution or to be fed back into the main grid, certainly makes for an enticing picture. In theory, the implementation of DG would reduce communities' reliance on centralised power sources, increase grid reliability and make small-scale ...
