

The case of Western Sahara is clear: two-thirds of the territory has been occupied by the Moroccan army since 1975, and now Morocco's main tool to continue the occupation has become the green transition. ... (SADR); in the same month the King of Morocco signed a treaty with Spain and Mauritania where they divided the territory. When ...

Since 1975, the dominant issue between the two countries has been the conflict in Western Sahara. After the former colonial power Spain withdrew its forces and handed control of the territory to Morocco and Mauritania, Algeria threw its support behind the local Sahrawi people's claims for self-determination and the Polisario movement fighting on their behalf.

Western Sahara and to its east the area that the Polisario considers its "liberated territory". In 1991, the two sides agreed to a UN-mediated settlement plan. Along with a UN-monitored ceasefire, this initiative divided Western Sahara along the sand berm, established a buffer strip and a restricted zone to separate Moroccan and Polisario

Western Sahara [a] is a disputed territory in North-western Africa has a surface area of 272,000 square kilometres (105,000 sq mi). [3] Approximately 30% of the territory (82,500 km² (31,900 sq mi)) is controlled by the Sahrawi Arab Democratic Republic (SADR); the remaining 70% is occupied [4] [5] and administered by neighboring Morocco. [6] It is the most sparsely ...

The EU Commission finally challenged that view, however, during a March 20 meeting, underlining that products from Western Sahara should not be imported illegally under preferential tariffs. Another critical challenge is identifying products transported from Western Sahara by plane or truck that are mixed with products from Morocco.

To put that in layperson's terms, Nelson said Tenaska's proposed 200-megawatt battery farm in Skagit County could power about 100,000 homes for eight hours. Location, location, location. Skagit County offers an early taste at how the fate of battery farm proposals may boil down to location more than anything else.

The first round of land allocations in Morocco's green hydrogen investment process may soon be completed and is likely to include substantial areas in the contested territory of Western Sahara. African Energy has ...
