

Who is cellcube?

CellCube intends to be a fully integrated producer of vanadium, vanadium electrolytes and vanadium redox flow batteries for the Energy Storage Market. We put 15 years of research and development into the CellCube to provide you with a top-notch energy storage system.

What is a cellcube used for?

With its simple and independent scalability in power output and storage capacity, the CellCube is already over 130 units in operation for individual industrial applications, to even out load peaks, for e-mobility solutions, for off-grid applications and for microgrid power supply in regions without a stable power grid.

What will cellcube's new FB250 & FF500 do?

In May, the upcoming formal launch at the Intersolar & EES Exhibition in Munich (booth C2.534), CellCube plans to release its final datasheets, but the company is now sharing a first glimpse of what can be expected. All new FB250's and FB500's will offer enhanced efficiencies of up to 94% for charging and 88% for discharging.
