

What is the current condition of the Dominican energy sector?

The PEN presents the current condition of the Dominican energy sector while outlining its future development. The DR's installed generation capacity connected to the National Interconnected Electric System (Sistema Eléctrico Nacional Interconectado - SENI) is around 5,631.47 MW and the average peak demand is around 3,312 MW.

What is the Dominican Republic's Energy Roadmap?

This roadmap was developed in close co-operation with the National Energy Commission (Comisión Nacional de Energía or CNE). It quantifies what can realistically be achieved by 2030 in the Dominican Republic's total energy system in terms of renewable energy technology potential, cost and savings.

Which sector consumes the most energy in the Dominican Republic?

Transport: this sector consumes the most energy in the Dominican Republic yet national energy plans do not consider renewables deployment for the sector. Liquid biofuels could replace gasoline and diesel but no market exists. Demand needs to be created by setting targets.

How much electricity will the Dominican Republic generate by 2030?

Data provided by CNE and IRENA estimates show that the Dominican Republic could generate 16 TWh of electricity from renewables by 2030. This would be produced from a renewable power generation capacity of 6 GW (from a total installed capacity of 10 GW, including non-renewable technologies).

Is the electric power sector affecting the Dominican economy?

Despite the present administration's efforts to increase the installed capacity of electricity generation from renewable sources, the electric power sector continues to be one of the most significant problems affecting the Dominican economy.

Does the Dominican Republic rely on fossil fuels?

The country relies heavily on fossil fuel imports, which account for nearly all of its primary energy supply at present. The Dominican Republic has set ambitious targets to reduce its per capita greenhouse gas (GHG) emissions.

“Eaton expands with a new manufacturing facility in Dominican Republic to cater to rising demand for its Bussmann fuses in renewable energy, energy storage systems, and ...

The partnership with AZUL means phos" innovative SoftPoS technology will be available to merchants in the Dominican Republic for the first time. This will enable AZUL customers to turn any NFC-enabled Android ...

Intelligent Energy System Services wird als Arbeitgeber von Mitarbeitenden mit durchschnittlich 4,4 von 5 Punkten bewertet. In der Branche Beratung/Consulting schneidet Intelligent Energy ...

Enlighten homes and businesses through next-generation utility platforms to ensure safe, reliable and efficient energy. It supports the energy matrix and supplies solutions to ensure the quality ...

USTDA's grant will help create enabling regulations for battery energy storage systems to maintain the stability of the country's power grid as new wind and solar power plants are built. ...
