The move follows Egypt's Petroleum Minister, Tarek El Molla, saying the country planned for renewables to make up 60% of its energy mix by 2030. Its location in the global "sun belt" means it averages 9-11 hours of sunshine a day, with few cloudy days, giving it high potential for harnessing renewables for hydrogen production.

5 ???· Egypt has announced an ambitious plan to establish 10 gigawatts of renewable energy capacity

by 2028 as part of its National Platform for the NWE Program. The initiative, ...

CAIRO - 7 November 2024: Egypt's Energy Strategy 2040 achieves all the state's goals towards sustainable development, economic development, confronting climate change, and reducing dependence on traditional fuels in electricity production, according to Dr. Hafez Salmawy, former head of the Electricity Regulatory Authority and consumer protection expert in the field of energy.

Egypt: Energy intensity: how much energy does it use per unit of GDP? Click to open interactive version. Energy is a large contributor to CO₂ - the burning of fossil fuels accounts for around three-quarters of global greenhouse gas emissions. So, reducing energy consumption can inevitably help to reduce emissions.
