

How does the IDB support El Salvador?

Based on its objectives, the IDB supports El Salvador in financing projects for the development of renewable energy, for research projects and the development of pilot programmes to verify the viability of renewable energy alternatives.

Who is responsible for implementing El Salvador's energy policy?

The primary entity for implementing this energy policy is the CEL and its subsidiary companies. These assume a strategic role in energy research, project execution and renewable energy generation, as well as maintaining a high degree of co-ordination with the CNE in the development of El Salvador's energy sector.

What is the energy supply in El Salvador?

In 2019, total energy supply in El Salvador reached around 156 600 TJ (see Figure 5). That year, the renewable energy source with the largest share as part of the primary energy supply was bioenergy (19.6%), followed by hydropower (3.5%), geothermal energy (3.4%), and solar energy (1.1%) (CNE, 2020).

What is El Salvador's energy sector like?

El Salvador's energy sector is largely focused on renewables. El Salvador is the largest producer of geothermal energy in Central America. Except for hydroelectric generation, which is almost totally owned and operated by the public company CEL (Comisi3n Hidroelctrica del R3o Lempa), the rest of the generation capacity is in private hands.

Is biomass a good energy source in El Salvador?

Traditional biomass - the burning of charcoal, crop waste, and other organic matter - is not included. This can be an important energy source in lower-income settings. El Salvador: How much of the country's energy comes from nuclear power? Nuclear energy - alongside renewables - is a low-carbon energy source.

Will El Salvador get a new PPA for renewables?

This project already holds a PPA, which was awarded during the first energy bidding process in El Salvador back in 2012. It will also cover a large part of the distribution companies' demand. Following the plant coming online, the allocation of new PPAs for renewables will likely depend on the growth of electricity demand and future energy policy.

In the rapidly evolving landscape of international travel and investment, El Salvador has emerged as an unexpected powerhouse for both crypto and digital entrepreneurs. The country's passport, now ranked 37th globally, unlocks visa-free access to 137 countries, marking a dramatic shift in Central American mobility. For investors, digital nomads, and...
