El Salvador's Green Energy Ambitions: 95% Renewable Projects Set to Transform the Nation in 2024. - El Salvador in English El Salvador's Green Energy Ambitions: 95% Renewable Projects Set to Transform the Nation in 2024.

Does El Salvador have a national energy policy?

Institutional structure of energy sector El Salvador's National Energy Policy 2020-2050 was still being developed by CNE at the time of this report's release, with a publishing date of later in 2020. At time of writing, the existing national energy policy was thus still the one published by the Council in 2010 (CNE, 2010).

Does El Salvador have a target for renewables in end-use sectors?

El Salvador does not currently have targets for renewables in end-use sectors, either. Establishing targets for renewable energy in transport, heating and cooling, agriculture and industry could contribute to a further scale-up of renewables in the country, and help achieve emissions reduction targets while creating new business opportunities.

Does El Salvador need a regional energy strategy?

El Salvador benefited greatly from regional energy integration and plays an active role in the MER. The country should therefore incorporate the Regional Energy Strategy 2030 in its national long-term planning efforts. This is in line with the country's overall development strategy and assures the participation of both public and private sectors.
