

What is Oneida energy storage?

Oneida Energy Storage (OES Project) is a 250 MW/1000 MWh battery storage facility, which has the potential to absorb surplus electricity from the Ontario power grid during off-peak hours, in order to return it to consumers when it is needed the most.

How much money will Oneida energy storage LP invest?

We will invest up to \$535 million in the project, located in Southwestern Ontario. Under the terms of the investment, Oneida Energy Storage LP, together with private sector lenders, will finance the balance of the project's capital cost.

Will the Oneida energy storage project help Six Nations achieve economic self-sufficiency?

"The Oneida Energy Storage project has the potential of contributing significantly to our mission of achieving economic self-sufficiency for the people of Six Nations," said Elected Chief Mark Hill, Six Nations of the Grand River. The proposed project includes the development of a 250-MW/1000-MWh energy storage facility in Southwestern Ontario.

What is the IESO agreement with Oneida energy storage LP?

Following a directive from the Minister of Energy, the IESO has finalized a 20-year agreement with Oneida Energy Storage LP. The 250-megawatt (MW) storage project is being developed in partnership with the Six Nations of the Grand River Development Corporation, Northland Power, NRStor and Aecon Group and is expected to be operational in 2025.

What is Oneida & how does it work?

Oneida is a first of its kind project at the forefront of Canada's emerging energy storage sector and is paving the way for other projects like it. Oneida is really the blueprint for successful public-private partnership and collaboration.

Is the Oneida energy storage project a Win-Win-Win?

This infrastructure project is a win-win-win. The Oneida Energy Storage project is a historic achievement built on a foundation of respect and equal partnership with the Six Nations of the Grand River.

Oneida Energy Storage is expected to provide significant benefits to provincial ratepayers by reducing the need and cost associated with using gas-fired power plants during times of peak demand. The Project will help Ontario reduce greenhouse gas emissions by 4.1 million tonnes, or the equivalent of taking 40,000 cars off the road every year. ...
