

What is El Salvador's energy sector like?

El Salvador 's energy sector is largely focused on renewables. El Salvador is the largest producer of geothermal energy in Central America. Except for hydroelectric generation, which is almost totally owned and operated by the public company CEL (Comisi&#243;n Hidroel&#233;ctrica del R&#237;o Lempa), the rest of the generation capacity is in private hands.

How much solar power does El Salvador have?

From pv magazine LatAm El Salvador's energy regular, SIGET, said this week that the country's total installed PV capacity reached 633 MW by the end of 2023. The nation's total installed power generation capacity now stands at 2.99 GW, with 638 MW from hydropower. Solar accounts for about 21.1% of the nation's electricity mix.

What is El Salvador's energy supply?

El Salvador's energy supply primarily comes from fossil fuels, such as oil, gasoline, diesel, liquid petroleum gas (LPG), kerosene, and bunker fuel. Natural gas does not play a role in El Salvador's energy supply.

How does electricity work in El Salvador?

From there, the gas powers 19 internal combustion engines and waste heat feeds one steam turbine. Two 230-kV electric transmission lines, one of which connects to the Central American Electrical Interconnection System, provides added grid reliability to the region and opens further opportunities for renewable energy in El Salvador.

Is El Salvador a sustainable country?

It has been noted that El Salvador's national policies have begun to fall in line with the United Nations 2030 Agenda for Sustainable Development. El Salvador's National Energy Council (CNE) develops their energy strategy, and has focused on energy efficiency and the promotion of renewable energy sources.

Why did El Salvador start auctioning power?

Under the General Electricity Law of 1996, auctions were made the preferred method to purchase power in El Salvador, specifically pertaining to geothermal and hydroelectric power sources. This was one way in which El Salvador began to incentivize investment in, and development of, renewable energy sources.
