

What can you do with a degree in Energy Engineering Technology?

Design modern solutions for efficient energy generation, transmission and distribution to industrial, commercial and residential customers. Energy Engineering Technology graduates will be at the forefront of addressing the grand challenge of climate change.

What can I do with a degree in Energy Science?

Students study the emerging technologies, policies, and environmental challenges in various energy-related fields. Potential career industries include, but are not limited to: renewable energy, power plants, power transmission and distribution, and electric vehicles.

Why is hydrogen a leading energy storage medium?

cal energy storage: HydrogenHydrogen is widely considered a leading chemical energy storage medium because it can be directly produced from electricity in a single step and consumed either as a fuel to produce power or as a feedstock or heat source for other industrial processes. We focus on hydrogen in t

What is Energy Engineering Technology?

From the ways electricity is generated to its use in residential, commercial, or industrial contexts, there are many processes to understand and improve. Energy Engineering Technology students comprehend energy generation, transmission, and distribution, and how it connects to engineering theories and practices.

Is hydrogen a form of energy storage for the electricity sector?

is chemical storage section. Hydrogen's role as a form of energy storage for the electricity sector will likely depend on the extent to which hydrogen is used in the overall economy, which in turn will be driven by the future costs of hydrogen production, transportation, and storage, and by the pace of innovation in h

Where will energy storage be deployed?

energy storage technologies. Modeling for this study suggests that energy storage will be deployed predominantly at the transmission level, with important additional applications within urban distribution networks. Overall economic growth and, notably, the rapid adoption of air conditioning will be the chief drivers
