

Who is Enefit Green?

At the end of 2023, Enefit Green had around 64,000 investors, whose strong interest in Enefit Green speaks of trust and a desire to be part of the green revolution. Our responsibility is bigger than renewable energy production. We ensure a cleaner environment and reduce our carbon footprint.

Where does Enefit Green produce its electricity?

The production result was mainly driven by new wind and solar farms in Estonia, Lithuania, Finland, and Poland (both by those commissioned last year and by those still under construction) the production of which accounted for over half of Enefit Green's total electricity production.

How much solar energy did Enefit Green produce in November?

Solar energy production in November reached 1.5 GWh growing by almost a half year-over-year, but characteristically for the season, only accounted less than 1% of Enefit Green's electricity production in November. "November was once again a month with record production, surpassing the record achieved in October by more than 26 GWh.
