

What is Saudi Arabia's energy strategy?

The kingdom aims to increase its electricity generation capacity from 83 gigawatts (GW) in 2023 to 110 GW by 2028, supported by a \$293 billion investment in both conventional power and renewable energy projects. At the heart of this strategy is Saudi Arabia's goal to generate 50% of its electricity from renewable sources by 2030.

How much power does Saudi Arabia need?

Saudi Arabia has established a goal to source at least 50 percent of its power from renewable energy by 2030, expanding its capacity to 130 gigawatts (GW), 58.7 GW of which is expected to come from solar and 40 GW from wind. This target is the most ambitious of its kind among Gulf Cooperation Council (GCC) countries (Figure 1).

Does Saudi Arabia need energy conservation policies?

Consequently, there is an urgent need to develop energy conservation policies for sustainable development. Electricity generation is 40% from Oil 52% from Natural Gas and 8% from steam. Generation capacity is approximately 55 GW. A looming energy shortage requires Saudi Arabia to increase its capacity.

Does Saudi Arabia generate electricity from solar?

While solar provided only 0.2% of Saudi Arabia's electricity generation, the country did not generate any electricity from nuclear or renewable sources such as hydro and wind. Whereas, in 2022 its neighbour the United Arab Emirates generated 17% of its electricity from clean energy sources.

How many nuclear power plants are there in Saudi Arabia?

In 2010, King Abdullah City for Atomic and Renewable Energy was established. The Saudi government plans a \$100 billion program of nuclear power with the goal of generating 110 gigawatts by 2032, using at least 12 nuclear power plants which are intended to begin coming into operation in 2019.

How much solar power will Saudi Arabia have by 2030?

The program targets achieving 40 GW of photovoltaic (PV) solar capacity, 16 GW of wind capacity, and 2.7 GW of concentrated solar power (CSP) capacity by 2030. Key projects include the King Abdullah Petroleum Studies and Research Center's solar endeavor and Saudi Aramco's PV carport system.

GEMTEC, Dammam, Saudi Arabia Opened in 2011, the GEMTEC campus includes the GEMTEC Service and Repairs Center for gas turbines, a Monitoring & Diagnostics Center of Excellence for the remote monitoring of power ...

Whereas, in 2022 its neighbour the United Arab Emirates generated 17% of its electricity from clean energy sources. Saudi Arabia's power sector emissions more than doubled in the last two decades, with the increase

in electricity demand predominantly met by fossil gas. The country generated 67% of its electricity from fossil gas and 33% ...

Saudi Arabia Total Energy Consumption. Consumption per capita is very high, reaching 6.5 toe in 2022, including about 9.2 MWh of electricity. ... In addition to the target of 50% renewables in the power mix by 2030, Saudi Arabia wants to develop green hydrogen production, carbon capture, use and storage (CCUS), and to reduce global methane ...

2 ???· Dec. 18--JEDDAH -- Saudi utility giant ACWA Power launched three renewable projects in Uzbekistan, including wind, solar, and battery storage, marking a \$3 billion investment in the country's energy transition. On Dec. 18, Uzbekistan's President Shavkat Mirziyoyev and the Kingdom's Minister of Energy, Prince Abdulaziz bin Salman, who joined virtually, inaugurated ...

12.05.2025 - 15.05.2025 Saudi Plastics & Petrochem 2025 Riyadh, Saudi Arabia. Saudi Plastics & Petrochem exhibitions aim to increase awareness of sustainability as an important industrial concept that, through the optimal use of natural resources, play a major role in protecting the future of subsequent generations

Image: MasdarIn a transformative move for Saudi Arabia's renewable energy ambitions, a consortium led by Masdar, alongside GD Power of China and Korea Electric Power Corporation (KEPCO), has been awarded the Al Sadawi Independent Power Producer (IPP) project. This 2,000MWac solar photovoltaic plant, to be located in the Sadawi Region, ...

Saudi Arabia has moved forward in the implementation of energy efficiency standards on key sectors and end-uses linked to their energy saving potential. These standards are focused on and the transport and building sectors. ... Power Methane abatement Economy-wide ... Executive Director meets with Saudi Energy Minister, H.E. Khalid A. Al-Falih ...

With Saudi aiming to meet power demand through an optimal energy mix for electricity production of 50 per cent from renewable energy and 50 per cent from gas technology by 2030, Saudi Power Procurement Company (SPPC) recently announced the award of contracts for the 1.8 GW Rumah 2 and 1.8 GW Al Nairyah 2 conventional independent power producer ...

Saudi Arabia's Minister of Energy has unveiled that the country plans to tender 6 GW of gas-fired CCGT power plants projects with CCS in Saudi Arabia in 2025. These projects form part of a wider programme to upgrade ...

Egyptian engineering giant Elsewedy Electric Company has unveiled a \$1 billion power generation project in partnership with Siemens Energy and Saudi Electricity Company (SEC).. The project, located in Rabigh, Saudi Arabia, will deliver a state-of-the-art power station with a total capacity of 1,200 megawatts (MW) using a combined cycle system.

Saudi Arabia is the fastest growing electricity consumer in the Middle East, particularly of transportation fuels. In 2005, Saudi Arabia was the world's 15th largest consumer of primary energy, of which over 60 percent was petroleum-based. The remainder was made up of natural gas. Two ministries share responsibility for the energy sector: the Ministry of Oil an...

JEDDAH: Saudi Arabia will add 4,500 megawatts of renewable energy to its grid after its procurement agency issued a request for qualifications for the sixth round of solar and wind projects. The ...

Saudi Arabia, with its resources and financial capabilities, has the potential to become a global role model for combating desertification and utilizing renewable energy. Despite ambitious projects like the "Saudi Green Initiative" and NEOM, the country has not yet fully realized its potential. This article outlines an innovative approach designed to encourage Saudi ...

Arab Finance: Elsewedy Electric, in partnership with Siemens, is setting up a power plant in Saudi Arabia's city of Rabigh with investments of \$800 million, an official at Elsewedy Electric told Al Arabiya Business. Elsewedy Electric is currently in the construction phase of the plant, that will operate with a gas and steam turbine system, the official said, expecting the project to be fully ...

Energia is a trusted provider of innovative energy solutions in Saudi Arabia. We offer sustainable and efficient solutions for residential, commercial, and industrial applications. Energia solution. Overview; ... Energia's success in tackling power shortages. Powering the Eastern Province. Energia case study on seamless operation success.

The Chinese solar PV supplier JinkoSolar has signed a supply contract with the Saudi company ACWA Power to deliver 3 GW of solar panels for the PIF4 solar cluster project in Saudi Arabia. The contract features two major sub-projects within the PIF4 cluster, namely the 1.2 GW Haden project, located near Makkah, and the 1.8 GW Al-Khushaybi project, located in ...
