

What type of energy does Venezuela use?

Venezuela relies heavily on domestic production of fossil fuels, with oil and natural gas comprising approximately 90% of the country's total energy supply. Hydro power also plays a key role in electricity generation, accounting for roughly half of installed capacity.

What is the largest oil company in Venezuela?

The largest oil company is Petróleos de Venezuela (PDVSA). Oil fields in the country include Bolívar Coastal Field, Boscon Field, Maracaibo Basin and Orinoco Belt. Hydro power provided 74% of domestic electricity in 2008. Venezuela produced 87 TWh hydro power in 2008, 2.6% of the world total.

Who owns the power plants in Venezuela?

EDC has 11% of Venezuelan capacity, and owns the majority of conventional thermal power plants. The rest of the power production is owned by private companies.

How much power does Venezuela have?

Venezuela's installed electrical capacity totals just over 30 GW, split roughly equally between fossil fuels and hydropower. The country's largest single power generator is the Guri hydroelectric project (also known as the Simon Bolivar hydroelectric project), with an installed capacity of 10,235 MW.

Is biomass a source of electricity in Venezuela?

Traditional biomass - the burning of charcoal, crop waste, and other organic matter - is not included. This can be an important source in lower-income settings. Venezuela: How much of the country's electricity comes from nuclear power? Nuclear power - alongside renewables - is a low-carbon source of electricity.

How big is Venezuela's electricity grid?

As of April 2022, Venezuela's electrical grid was said to be operating at 20% of capacity, with actual generation running 6 GW to 10 GW short of the country's needs, and an estimated investment of US\$12 to 15 billion required to restore the system to normal operating conditions.

Overview History Electricity production Organizations See also Weblinks The electricity sector in Venezuela is heavily dependent on hydroelectricity, with this energy source accounting for 64% of the country's electricity generation in 2021. The country relies on six hydroelectric plants, with Central Hidroeléctrica Guri providing the majority of this capacity. In 2021, natural gas and petroleum contributed 25% and 11% to electricity generation, respectively. Managed by CORPOELEC, the sector has declined due to outdated infrastructure and insufficie...
