

Could ocean thermal energy help Turks and Caicos meet its peak demand?

Once wave and ocean thermal technologies are proven in the marketplace, ocean energy and ocean thermal energy conversion have potential as well. Abundant wind and solar resources, as well as the potential for other renewable sources could help Turks and Caicos meet or exceed its peak demand of 34.7 MW.

Does Turks and Caicos have a policy on energy efficiency?

Turks and Caicos has few policies related to energy efficiency and renewable energy. Historically, the territory has not implemented policy mechanisms to aid in the development of clean and energy-efficient technologies.

Should the Turks and Caicos Islands embrace a sustainable future?

Calling for a national sustainability effort to tackle climate change and create a greener economy for the Turks and Caicos Islands, Mrs. Forbes stated, "We can and must embrace an energy future built on sustainability for our economy and planet. We have a unique opportunity to do so and to do it right."
