

Is the Turkmenistan-China Gas Pipeline a contribution to International Energy Cooperation?

Such a large-scale project as the Turkmenistan-China gas pipeline, through which Turkmen gas is supplied to the friendly country, can be viewed as a contribution of our state to the development of international energy cooperation.

What is Turkmenistan's energy policy?

The energy policy being consistently implemented under the leadership of President of Turkmenistan Serdar Berdimuhamedov is aimed at the comprehensive development of the fuel and energy complex and its dynamic integration into the international energy system.

What is Turkmenistan focusing on?

Turkmenistan is focused on the accelerated modernization of the fuel and energy complex and the expansion of its infrastructure through the creation of modern production facilities. Regarded in this light, our state's priority is the processing of natural gas and the production of new types of commodities.

Is biomass a source of electricity in Turkmenistan?

Traditional biomass - the burning of charcoal, crop waste, and other organic matter - is not included. This can be an important source in lower-income settings. Turkmenistan: How much of the country's electricity comes from nuclear power? Nuclear power - alongside renewables - is a low-carbon source of electricity.

How much natural gas does Turkmenistan supply?

Upon completion of the fourth D line, the annual Turkmen natural gas supply will reach a contractual 65bn m³/y. Turkmenistan also supplies gas to Azerbaijan, Iran, Russia and Uzbekistan, and recently signed a memorandum of understanding (MoU) to supply 9bn m³/y of natural gas to Iraq.

Who is Turkmenistan's largest customer?

Currently, Turkmenistan's largest customer is the People's Republic of China. Turkmenistan supplies over 30bn m³/y of natural gas to China through the three lines (A, B and C) of the Central Asia Gas Pipeline system. Upon completion of the fourth D line, the annual Turkmen natural gas supply will reach a contractual 65bn m³/y.
