

Can solar energy replace fossil fuels on Pitcairn Island?

Pitcairn's authorities have launched a renewable energy project designed to replace fossil fuels with solar energy. The goal is to replace 95% of the current diesel consumption on Pitcairn Island (75,000 liters per year) with a combination of energy saving and solar electricity through the installation of a hybrid photovoltaic solar energy system.

Who is EnergySolutions?

EnergySolutions is an international nuclear services company headquartered in Salt Lake City, Utah and Charlotte, North Carolina, with operations throughout the United States, Canada, Asia, and Europe. We are an industry leader in the safe transportation, processing, recycling, and disposal of radiologic material.
