

Why should you choose energy storage Canada?

We focus exclusively on energy storage and speak for the entire industry because we represent the full value chain range of energy storage opportunities in our own markets and internationally. Energy Storage Canada is your direct channel to influence, knowledge and critical industry insights.

Can energy storage accelerate Canada's net-zero goals?

The result is a sense of powerful momentum building within the sector to accelerate the development and deployment of energy storage, particularly within the context of enabling Canada's net-zero goals. Justin Rangooni, executive director of trade association Energy Storage Canada (ESC) takes us through some of the key developments to date.

Does energy storage Canada need immediate action?

Energy Storage Canada has six recommendations for immediate action that will unlock the full benefits energy storage has for B.C.'s electrical grid and economy.

Who is supporting energy storage Canada's election platform?

Former cabinet ministers, a past party leader, industry and energy experts in BC are coming together to support Energy Storage Canada's election platform for all political parties and candidates. "B.C. is a proud leader in climate action," says former B.C. Green Party Leader and climate scientist Andrew Weaver.

Are batteries a scalable energy-storage technology?

The electricity produced by wind energy and solar energy can be converted and stored through various means: Many of these technologies can be deployed at multiple scales, but batteries represent the most scalable energy-storage technology.

Is energy storage a viable non-wires-alternative (NWA)?

EVLO Energy Storage received the 2023 Landmark Application of Energy Storage Award for their Parent Project, located in Parent, Canada, which demonstrates the role energy storage can play as a part of the distribution grid, serving as a viable non-wires-alternative (NWA), and opens avenues in terms of future applications.

A recent white paper published by Energy Storage Canada, the nation's leading industry organisation for all things energy storage, concluded that anywhere between 8,000 MW to 12,000 MW of energy storage potential would optimally ...

The Solar Energy Industries Association (SEIA) is leading the transformation to a clean energy economy. SEIA works with its 1,200 member companies and other strategic partners to fight for policies that create jobs in every community ...

Read the agenda-setting paper, "Laying the Foundation: Six priorities for supporting the decarbonization of Canada's electricity grid with energy storage," to learn more about CanREA's perspective on what is required to advance ...

Facts at a Glance . Overall, the wind, solar and energy storage sector grew by a steady 11.2% this year.; Canada now has an installed capacity of 21.9 GW of wind energy, solar energy and energy storage installed capacity.; The industry ...

Image 3: Canada's actual installed capacity vs. Targets for wind, solar and energy storage: CanREA's 2023 data shows a total installed capacity of 21.9 GW of wind and ...

Founded in 2016, Energy Storage Canada (ESC) is a not-for-profit organization and the only national trade association in Canada dedicated solely to the growth and market development of the country's energy storage sector as a means of ...

Energy Storage Canada (ESC) is a not-for-profit organisation dedicated solely to the growth and market development of the country's energy storage sector as a means of accelerating the realisation of Canada's ongoing ...

Energy Storage Canada's report is the first to go beyond speculating the potential use cases for LDES technologies to research the potential scope of investment for Ontario as the province decarbonises, with new modelling from Dunskey ...

A 2022 report titled Energy Storage: A Key Pathway to Net Zero in Canada, commissioned by Energy Storage Canada, identified the need for a minimum of 8 to 12GW of installed storage capacity for Canada to reach its 2035 goal of a ...
