

What makes a good battery management system connector?

For battery management system (BMS) connectivity that supports safety-critical functions, reliability is especially important. Molex connectors with high retention force latches and positive locks provide secure connections for reliable system operation.

What battery terminals do I need for my power module?

Equipping your power module with these watertight, single pole, wrench disconnect, copper battery terminals will facilitate the incorporation of your modules into cutting edge EV, APU, Fuel Cell, and Weapons Systems. Rebling is a connectors manufacturer which specializes in high current (100 to 1,000 amps) Lithium Battery Terminals.

What is a miniaturized battery connector?

Facilitating more efficient integration of cells and modules within the battery pack, miniaturized connectors from Molex offer reduced weight, compact form factors and rugged features designed to maximize battery performance and lifespan in challenging automotive environments.
