

How much does an electric lunch box cost?

Price: The price of an electric lunch box would be top of mind for a majority of our survey respondents - 77%, in fact. An electric lunch box can range from about \$30 to more than \$200. One factor that drives the price is the power source - models that rely on rechargeable batteries tend to cost more than those that plug into an outlet.

Should you buy a portable electric lunch box?

Luckily, with the invention of the portable electric lunch box you can enjoy freshly heated meals whether you're in your car, at school, living in a dorm, or at the office. With so many options on the market, it might be tough to find a lunch box that suits your budget and your needs.

How much food can an Electric Lunch Box hold?

Most electric lunch boxes can hold at least two cups of food but some can fit as many as four cups. "Be realistic in the size you need," says registered dietitian and certified dietitian nutritionist Toby Amidor. "If it is too large or heavy, you probably will end up never or rarely using it. If it is too small, it may not fit your food."

What are the best Electric Lunch Boxes?

To find the best electric lunch boxes, we surveyed 100 people about the features that they find most important. We then evaluated the options based on size, price, design, and organizational features. The Crock-Pot Go Portable Food Warmer stood out to us as the best option overall.

How does an Electric Lunch Box work?

The rectangular electric lunch box has a convenient carrying handle that nests into the lid for easier storage. When you're ready to heat up the contents, plug in the detachable power cord that's stored on the bottom of the lunchbox. Once plugged in, the lunch box will begin warming.
