

How do you reinstall a dehumidifier?

If your dehumidifier is connected to the continuous drain hose, you must disconnect the hose, dry and then replace the drain cap back into the drain outlet. Remove the air filter and clean with water. Let the air filter dry and reinstall back into the unit. Make sure all parts of the dehumidifier and accessories are dry before storage.

How to store a dehumidifier?

Make sure all parts of the dehumidifier and accessories are dry before storage. Cover the dehumidifier with a cloth/plastic bag before storage, to protect the surface from dust and scratches. It is recommended to coil the power cord and store it off the floor to ensure it is protected from bends and kinks.

How do you re-start a dehumidifier?

Throw away the water from the water outlet and replace the bucket. The bucket must be in place and securely seated for the dehumidifier to operate. The machine will re-start when the bucket is restored in its correct position. Pull out the bucket a little. The unit can make the MAX dehumidification function when it is under Dryer mode.

How does a dehumidifier work?

HOW A DEHUMIDIFIER WORKS When the dehumidifier is switched ON, a fan pulls moisture-laden air into the dehumidifier where it passes through dehumidifying coils inside the unit. These coils condense moisture from the air and collect it in the water tank. The dry air is then exhausted from the dehumidifier.

How to clean a dehumidifier?

Only use a soft cloth to clean the appliance. The Dust Filter located at the back of the unit helps to remove dust particles from the air. A dirty filter clogged by dust particles can reduce the efficiency of the dehumidifier. For optimum dehumidification, it is recommended to clean the dust filter every 2 weeks:

Should you unplug a dehumidifier before emptying the water tank?

Always unplug the dehumidifier before emptying the water tank. The water collected in the tank must be discarded. The water should never be used for drinking. Always unplug the dehumidifier and remove the water from the water tank before cleaning, servicing or relocating the unit.
