

# Energy storage inverter test national standard

What are the electrical installation requirements for inverter energy systems?

This Standard specifies the electrical installation requirements for inverter energy systems and grid protection devices with ratings up to 10 kVA for single-phase units, or up to 30 kVA for three-phase units, for the injection of electric power through an electrical installation to the electricity distribution network.

What if the energy storage system and component standards are not identified?

Table 3.1. Energy Storage System and Component Standards 2. If relevant testing standards are not identified, it is possible they are under development by an SDO or by a third-party testing entity that plans to use them to conduct tests until a formal standard has been developed and approved by an SDO.

What is the energy storage standard?

The Standard covers a comprehensive review of energy storage systems, covering charging and discharging, protection, control, communication between devices, fluids movement and other aspects.

Are PV & storage inverters UL 1741 certified?

PV and storage inverters and some other products are listed to the safety standard UL 1741, which requires grid interactive equipment to pass the tests in IEEE 1547.1. UL is preparing to publish updates to this standard in early August to reference the new tests in the 2020 version.

Do electric energy storage systems need to be tested?

It is recognized that electric energy storage equipment or systems can be a single device providing all required functions or an assembly of components, each having limited functions. Components having limited functions shall be tested for those functions in accordance with this standard.

Do DER systems need a certified inverter?

Maryland updated its interconnection rules (Code of Maryland Regulations 20.50.09) this year with a requirement that DER systems must utilize inverters certified to IEEE 1547-2018 in order to be approved for interconnection to the grid starting January 1, 2022.
