

Flexible supercapacitors (FSCs) are promising energy storage devices in wearable electronic systems. They have attracted tremendous attention owing to their unique properties of ...

DOI: 10.1016/j.energy.2023.129465 Corpus ID: 264503630; Toward environmental sustainability: Data-driven analysis of energy use patterns and load profiles for urban electric vehicle fleets?

In 2024, new energy storage was written into the "Government Work Report" for the first time, which the industry regarded as a major positive news. ... Jiang Xinyu, Chairman ...

Chlorine doping endows Bi₂Te₃ with superior charge storage properties as a cathode material for high-performance aqueous zinc-proton hybrid ion batteries. Journal of Energy Storage 2024, 76, 109814. ...

Aqueous zinc batteries are environmentally benign and offer more flexibility in manufacturing processes but are plagued by limited energy densities because of an operating voltage below 2 V. Here, we demonstrate a ...

Xinyu Guan [...] Hai-Long Jiang; ... are highly demanded electrical energy storage devices due to their high power density with thousands of cycle life compared with pseudocapacitors and ...

Synthesis of Representative Driving Cycles for Energy Storage Based Urban Rail Vehicles Jiayu Mi 1,2, Jiuchun Jiang, Shaoyuan Wei1,2, Xinyu Jia 1 School of Electrical Engineering, Beijing ...

We report an aqueous Zn-V₂O₅ battery chemistry employing commercial V₂O₅ cathode, Zn anode, and 3 M Zn (CF₃SO₃)₂ electrolyte. We elucidate the Zn-storage mechanism in the V₂O₅ cathode to be that ...

"Electrochemical energy storage devices under particular service environments: Achievements, challenges, and perspective" is a paper by Jinfeng Sun Chanjuan Liu Xinyu Song Jinyang ...

The importance of such storage is especially crucial in densely populated urban areas, where traditional storage techniques such as pumped hydroelectric energy storage and compressed ...

Flexible supercapacitors (FSCs) are promising energy storage devices in wearable electronic systems. They have attracted tremendous attention owing to their unique properties of excellent flexibility, fast charging and discharging ...

Chitin is a native polysaccharide isolated from the exoskeleton of crustaceans, and chitosan is the deacetylated chitin with more than 50% building blocks containing primary ...

Xinyu Zhang. Department of Chemical Engineering, Auburn University, Auburn, AL, 36849 USA. Search for more papers by this author ... wearable health monitoring systems, ...
