

What is a battery energy storage system?

By definition, a battery energy storage system (BESS) is an electrochemical apparatus that uses a battery to store and distribute electricity, discharging the electricity to its end consumer.

What is battery energy storage system (BESS)?

Recent works have highlighted the growth of battery energy storage system (BESS) in the electrical system. In the scenario of high penetration level of renewable energy in the distributed generation, BESS plays a key role in the effort to combine a sustainable power supply with a reliable dispatched load.
