

What is the 'guidance on accelerating the development of new energy storage?

Since April 21, 2021, the National Development and Reform Commission and the National Energy Administration have issued the 'Guidance on Accelerating the Development of New Energy Storage (Draft for Solicitation of Comments)' (referred to as the 'Guidance'), which has given rise to the energy storage industry and even the energy industry.

What is the 'guidance' for the energy storage industry?

Based on the above analysis, as the first comprehensive policy document for the energy storage industry during the '14th Five-Year Plan' period, the 'Guidance' provided reassurance for the development of the industry.

What are the main goals of new energy storage development?

The main goals of new energy storage development include: Full market development by 2030. 1) Strengthening planning guidance to encourage the diversification of energy storage; 2) Promoting technological progress to expand the energy storage industry system; 3) Improving the policy mechanism to create a healthy market environment;

How to improve energy storage industry?

1) Strengthening planning guidance to encourage the diversification of energy storage; 2) Promoting technological progress to expand the energy storage industry system; 3) Improving the policy mechanism to create a healthy market environment; 4) Standardisation of industry management to improve the construction and operation.

Will energy storage eliminate industrial development?

In the context of the 'dual-carbon' goal and energy transition, the energy storage industry's leapfrog development is the general trend and demand. The follow-up actions will inevitably introduce a series of policies for the development of energy storage to eliminate industrial development. Faced with 'obstacles' one by one.

Will energy storage industrialization be a part of the 14th five-year plan?

While looking back on 2020, we also looking forward to the development of energy storage industrialization during the 14th Five-year Plan, as policy and market mechanisms become the key to promote the full commercialization and large-scale application of energy storage.

In an important discussion on January 25, the Union Minister of Power and New and Renewable Energy, R.K. Singh interacted with Renewable Energy developers, industry and various ...

The Green Tank has submitted its comments to the public consultation on the Ministry of Environment and

Energy's draft law "Regulations for the modernization of waste management, the improvement of the energy ...

In an important discussion on January 25, the Union Minister of Power and New and Renewable Energy, R.K. Singh interacted with Renewable Energy developers, industry and various government representatives to discuss the ...

Energy storage is becoming an increasingly important part of the national electricity market (NEM) and recent forecasts point to a greater role for storage in the future. ... On 3 December 2020 ...

MITEI's three-year Future of Energy Storage study explored the role that energy storage can play in fighting climate change and in the global adoption of clean energy grids. Replacing fossil fuel-based power generation with power ...

Energy-Storage.news proudly presents our sponsored webinar with CSA Group on large-scale fire testing (LSFT) of battery energy storage systems (BESS). ... Balancing Safety and Profitability ...

The National Development and Reform Commission and the National Energy Administration proposed a "two integrations" energy development strategy in the "Guiding Opinions on the Development of ...

Since April 21, 2021, the National Development and Reform Commission and the National Energy Administration have issued the "Guidance on Accelerating the Development of New Energy Storage (Draft for Solicitation ...

1) Strengthening planning guidance to encourage the diversification of energy storage; 2) Promoting technological progress to expand the energy storage industry system; 3) Improving ...
