

Energy storage policy in the fourth quarter

How did the US battery storage market perform in Q4 2023?

The US battery storage market shattered deployment records across all segments in Q4 2023 - a 101% increase from the previous quarter. The US battery storage sector saw 4,235 megawatts (MW) installed in Q4 2023, according to Wood Mackenzie and the American Clean Power Association's (ACP) latest "US Energy Storage Monitor" report.

Does Verisk have more energy storage capacity in Q4 2021?

According to Wood Mackenzie, a Verisk business (Nasdaq: VSK), and the American Clean Power Association's (ACP) latest US Energy Storage Monitor report, released today, Q4 2021 saw more capacity installed than in the first three quarters combined, despite project delays.

How many GW does the US energy storage industry have?

Across all segments, the US energy storage industry deployed 8.7 GW, a record-breaking growth of 90% year on year. The nation deployed 4.2 GW in the fourth quarter of 2023, and installations in California and Texas accounted for 77% of fourth-quarter additions, said Wood Mackenzie.

What is the future for energy storage deployment?

With a robust pipeline, the future for energy storage deployment is strong. Vanessa Witte, senior analyst with Wood Mackenzie's energy storage team, said: Q4 2023 was extremely strong for the US energy storage market, helped by easing supply chain challenges and system price declines.

What is Clean Power quarterly?

Our Clean Power Quarterly provides a snapshot view of the latest U.S. utility wind, solar, and battery storage industry activity and trends.

What is the future of energy storage?

These benefits to the grid have been evident, especially in recent years, as storage has provided reliability and stability during critical moments like historic heat waves. With a robust pipeline, the future for energy storage deployment is strong. Vanessa Witte, senior analyst with Wood Mackenzie's energy storage team, said:

WESTLAKE VILLAGE, Calif., March 12, 2024--Energy Vault Holdings, Inc. (NYSE: NRGV) ("Energy Vault" or "the Company"), a leader in sustainable, grid-scale energy ...

In July 2021 China announced plans to install over 30 GW of energy storage by 2025 (excluding pumped-storage hydropower), a more than three-fold increase on its installed capacity as of 2022. The United States' Inflation Reduction Act, ...
