

What is Blackstone private equity?

Blackstone private equity has invested or committed \$16 billion of equity globally across a broad range of sectors within the energy industry. Blackstone (NYSE: BX) is one of the world's leading investment firms.

Is energy storage an asset class?

Energy storage, once a sliver of the renewable-power generation sector, is becoming an asset class of its own, and some early private-equity backers of battery-project developers are beginning to reap the benefits.

Who is Blackstone Energy Partners?

Blackstone Energy Partners is Blackstone's energy-focused private equity business, with a successful record built on our industry expertise and partnerships with exceptional management teams. Blackstone private equity has invested or committed \$16 billion of equity globally across a broad range of sectors within the energy industry.

How big is the battery storage market?

The battery storage market is growing in tandem with electric vehicle use. Australian energy research company Aurora Energy predicted in Europe alone the sector will attract over EUR70 billion of investment by 2050.

Is private equity a good investment?

But it is also building into a clear opportunity for private equity to do what it does best: supply investment capital and help businesses accelerate growth. Across a broad swath of the global economy, the shift presents a fertile field for investment. It also poses important issues for how funds manage their portfolios.

How will the energy transition affect PE investment?

While the energy transition promises to open up new areas for investment, it is also generating new risks and imperatives for PE portfolios. Between the demands of regulators, limited partners, lenders, and customers, demonstrable efforts to decarbonize are increasingly becoming table stakes for PE investment.
