

What tools are used for energy storage analysis and development?

The tools below are used globally for energy storage analysis and development. System Advisory Model (SAM) SAM is a techno-economic computer model that calculates performance and financial metrics of renewable energy projects, including performance models for photovoltaic (PV) with optional electric battery storage.

What is QuEST - energy storage evaluation application suite?

QuEST: An Energy Storage Evaluation Application Suite Sandia National Laboratories QuEST currently consists of three interconnected applications (Data Manager, Valuation and BTM) that individually and collectively help project engineers and researchers evaluate energy storage systems for different use cases.

What should a project application include?

- o Project Goal: The applicant should explicitly identify the targeted improvements to the baseline technology and the critical success factors in achieving that goal.
- o DOE Impact: The applicant should discuss the impact that DOE funding would have on the proposed project.

What should be included in a project overview?

The Project Overview should contain the following information:

- o Background: The applicant should discuss the background of its development status (i.e., the technical baseline) relevant to the technical topic being addressed in the Full Application.

What is the Funding Opportunity Announcement - mod 000001?

Please see the full Funding Opportunity Announcement - Mod 000001 in the Announcement Documents section for full details. The Infrastructure Investment and Jobs Act (IIJA), commonly referred to as the Bipartisan Infrastructure Law (BIL) authorizes DOE to invest \$1 billion in energy improvements in rural or remote areas.

What should be included in a project proposal?

- o A description of the technology's impact;
- o Proposed project goals;
- o Any key graphics (illustrations, charts and/or tables);
- o The project's key idea/takeaway;
- o Topline community benefits;
- o Project title, prime recipient, PI, and Senior/Key Personnel information; and
- o Requested EERE funds and proposed applicant cost share.

The projects funded by ARPA-E are developing entirely new ways to generate, store, and use energy. Early-stage technologies supported by ARPA-E have the potential to support energy independence, reduce emissions, improve energy ...

CarbonSAFE Phase III projects commenced in 2020 and include the acquisition, analysis, and development of information to fully characterize storage complexes at multiple locations across the nation to demonstrate storage resources for ...

During the more technical portions of BESS project development, agencies are encouraged to utilize the Federal Energy Management Program's BESS Technical Specifications and Distributed Energy Interconnection ...

Selected and Awarded Projects. On September 22, 2023, OCED announced projects selected for award negotiations following a rigorous Merit Review process to identify meritorious applications based on the criteria listed in the ...

Office: Carbon Management FOA number: DE-FOA-0002711 Download the full funding opportunity: FedConnect Funding Amount: \$2.25 billion Background Information. On October 21, 2024, announced more than \$518 ...

The project goals are to establish leading practices related to permitting requirements for offshore carbon capture and storage development for CO₂ storage projects in Louisiana State waters ...

Project State Borrower Name Loan Amount Project Summary; AK: Alaska Electric and Energy Cooperative, Inc. \$100,000,000: Alaska: Alaska Electric and Energy Cooperative Inc. received ...
