

Why should you choose energy storage Canada?

We focus exclusively on energy storage and speak for the entire industry because we represent the full value chain range of energy storage opportunities in our own markets and internationally. Energy Storage Canada is your direct channel to influence, knowledge and critical industry insights.

What is energy storage & why is it important?

Energy storage will allow the storage of baseload generation like nuclear and hydro while also supporting the integration of intermittent resources like wind and solar. The governments of Canada and Ontario are working together to build the largest battery storage project in the country.

What is the Oneida energy storage project?

"The Oneida Energy storage project represents a significant Indigenous-led development that will create good jobs for Canadians while reducing emissions. The Government of Canada is pleased to invest \$50 million in building this project with Indigenous partners -- resulting in one of the world's largest battery storage projects.

What are the opportunities for energy storage development & financing?

Accordingly, opportunities for energy storage development and financing are rising, similar to the heightened interest in the solar technologies a decade ago. Such opportunities are motivated by positive regulatory changes and incentive programs.

Is energy storage a new economic frontier?

With the country's target to reach zero-net emissions by 2050, energy storage is a strategic component in the energy transition and a new economic frontier. Accordingly, opportunities for energy storage development and financing are rising, similar to the heightened interest in the solar technologies a decade ago.

This energy corridor is soon to be the site of Canada's largest battery storage farm and the third largest in the world: the Oneida Energy Storage Project. Now under construction, the project will be part-owned by Six Nations, ...

The Oneida Energy Storage Project is a 250MW/1,000 MWh advanced stage, stand-alone lithium-ion battery storage project, representing one of the largest clean energy storage projects in the world. It will deliver critical capacity and ...

A 2022 report titled Energy Storage: A Key Pathway to Net Zero in Canada, commissioned by Energy Storage Canada, identified the need for a minimum of 8 to 12GW of installed storage capacity for Canada to reach ...

Earlier this week, Energy-Storage.news published a Guest Blog from Justin Rangooni, executive director of trade group Energy Storage Canada. Rangooni wrote that energy storage has a vital role to play in the future ...

Winners of the procurement with BESS bids include Boralex, a Toronto Stock Exchange-listed renewable energy developer, with two projects: Hagersville Battery Energy Storage Park, a 300MW, 4-hour duration ...

Independent Electricity System Operator announces 739 MW of energy storage projects to support reliability and sustainability goals. May 16, 2023 - Toronto, ON - Today, ...
