

Are Trane rooftop units energy efficient?

Trane rooftop units offer superior indoor air quality, industry leading energy efficiency, hassle-free installation--everything you need for new construction or replacement projects. Superior EER and IEER ratings mean outstanding occupant comfort plus energy efficient operation for single or multiple zones.

Is Ice Energy a hybrid air conditioning and energy storage system?

As such, the system is something of an air conditioning and energy storage hybrid. Ice Energy describes its system as a thermal battery, and like batteries the company articulates the scale of its units in watt and watt-hour terms.

What is a Carrier WeatherExpert® packaged rooftop unit?

The Carrier WeatherExpert® Packaged Rooftop Unit series provides comfort and energy efficiency never seen before. WeatherExpert units, available in 3-23 ton sizes, use multi-stage compressors, a single refrigerant circuit and SAV(TM) (Staged Air Volume) logic to provide part-load efficiencies that lead the industry.

Why are rooftop AC units cranking the hardest?

Heat, unlike sunlight, keeps gathering throughout the day, and tends to peak in the late afternoon. That means that those rooftop AC units are cranking their hardest right when solar power is already fast on its way to dropping off to its evening zero point.

Are Trane rooftop systems more efficient than traditional VAV systems?

With new technologies and optimized controls, these systems are 20% to 30% more efficient than traditional multiple-zone VAV systems. Trane rooftop units offer superior indoor air quality, industry-leading energy efficiency, and hassle-free installation - everything you need for new construction or replacement projects.

What is the largest distributed thermal energy storage system?

And while there have been larger single-site thermal storage projects, such as the molten salt system at the 300 MW Solana Concentrating Solar Power (CSP) plant in Arizona, Ice Energy says that when complete this will be the largest distributed thermal energy storage system in the nation.
