

Should Iraq rely on state financing for energy projects?

There has scarcely been a more urgent time for Iraq to pursue crucial reforms in its energy sector to ensure that investment continues even when government revenues have been decimated by low oil prices. The alternative of continuing to rely on direct state financing of large projects only increases the risk that these projects are delayed.

Will IEA support Iraq's Energy reforms?

As Iraq's newly formed government begins to tackle the long list of considerable challenges it faces, the IEA stands ready to support the country in its efforts to enact the reforms that will help its energy sector - and its economy - meet its vast potential.

Why is government financing a major infrastructure project in Iraq a problem?

The current model, which favours government financing of large infrastructure projects across the sector, is prohibitively burdensome at times of depressed oil revenues and risks indefinite delays to projects that are crucial to Iraq's economic development.

Power generation from renewable energy sources would increase Iraq's energy security and reduce the power sector's greenhouse gas emissions, which account for almost half of Iraq's total emissions, due to its ...
