

What is the future of energy storage?

"The Future of Energy Storage," a new multidisciplinary report from the MIT Energy Initiative (MITEI), urges government investment in sophisticated analytical tools for planning, operation, and regulation of electricity systems in order to deploy and use storage efficiently.

What is the Energy Storage Research Alliance (Esra)?

The Energy Storage Research Alliance will focus on advancing battery technology to help the U.S. achieve a clean and secure energy future. Berkeley Lab's contributions to ESRA include world-leading energy storage research expertise and capabilities, such as the Advanced Light Source. Credit: Marilyn Sargent/Berkeley Lab

Can long-duration energy storage transform energy systems?

In a new paper published in Nature Energy, Sepulveda, Mallapragada, and colleagues from MIT and Princeton University offer a comprehensive cost and performance evaluation of the role of long-duration energy storage (LDES) technologies in transforming energy systems.

When is long-term energy storage important?

"This is when long - term energy storage becomes crucial." Long duration energy storage (LDES) generally refers to any form of technology that can store energy for multiple hours, days, even weeks or months, and then provide that energy when and if needed.

Can long-duration energy storage help secure a carbon-free electric grid?

Researchers evaluate the role and value of long-duration energy storage technologies in securing a carbon-free electric grid.

What is the DOE/DoD long-duration energy storage joint program?

DOE/DOD Long-Duration Energy Storage Joint Program: These projects will demonstrate LDES technologies on government facilities through collaboration between DOE and Department of Defense (DOD). View announcements, including upcoming funding opportunities, for all LDES programs [here](#).

RICHLAND, Wash.--Scientists, legislators, community leaders and officials of the Department of Energy gathered today at DOE's Pacific Northwest National Laboratory to dedicate a new 93,000-square-foot research ...

In an interview earlier this year with Energy-Storage.news Premium, Helena Li, executive president at Trina Solar, said that using an in-house developed and manufactured LFP cell enables higher levels of quality ...

Exploring different scenarios and variables in the storage design space, researchers find the parameter combinations for innovative, low-cost long-duration energy storage to potentially make a large impact in a
